REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The general concept of "generating a narrowband subaudible probe signal" was known in the art at the time of the invention, as evidenced by Finn et al. references cited below (see, for example, Figures 5, and 7-8 of the USPN 6496581 reference). However, the examiner has not found prior art that teaches or suggests the modification of Finn et al in order to "generating a narrowband subaudible probe signal using the processed signal and the detected feedback component" wherein the generated narrowband subaudible probe signal is used to probe the acoustic feedback path in order to adjust a feedback-inhibiting filter which inhibits the feedback component in the input audio signal defined in the independent claims 1, 9, 12, 17, 29, 42, and 44. For at least the reasons listed above, the dependent claims are also allowed in view of their respective dependencies upon the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
